

Disabling Popups

Firefox

- Click on the “Tools” menu
- Select “Options”
- Select the “Web Features” icon
- Block popup windows should be checked. Do NOT uncheck this box. Instead, click on the first box that reads “Allowed Sites” and type in the address of the site that you want to allow (e.g. www.forestinfo.com – do not type in the http:// or anything after the .com, .org, .edu, etc.)
- Click “OK”

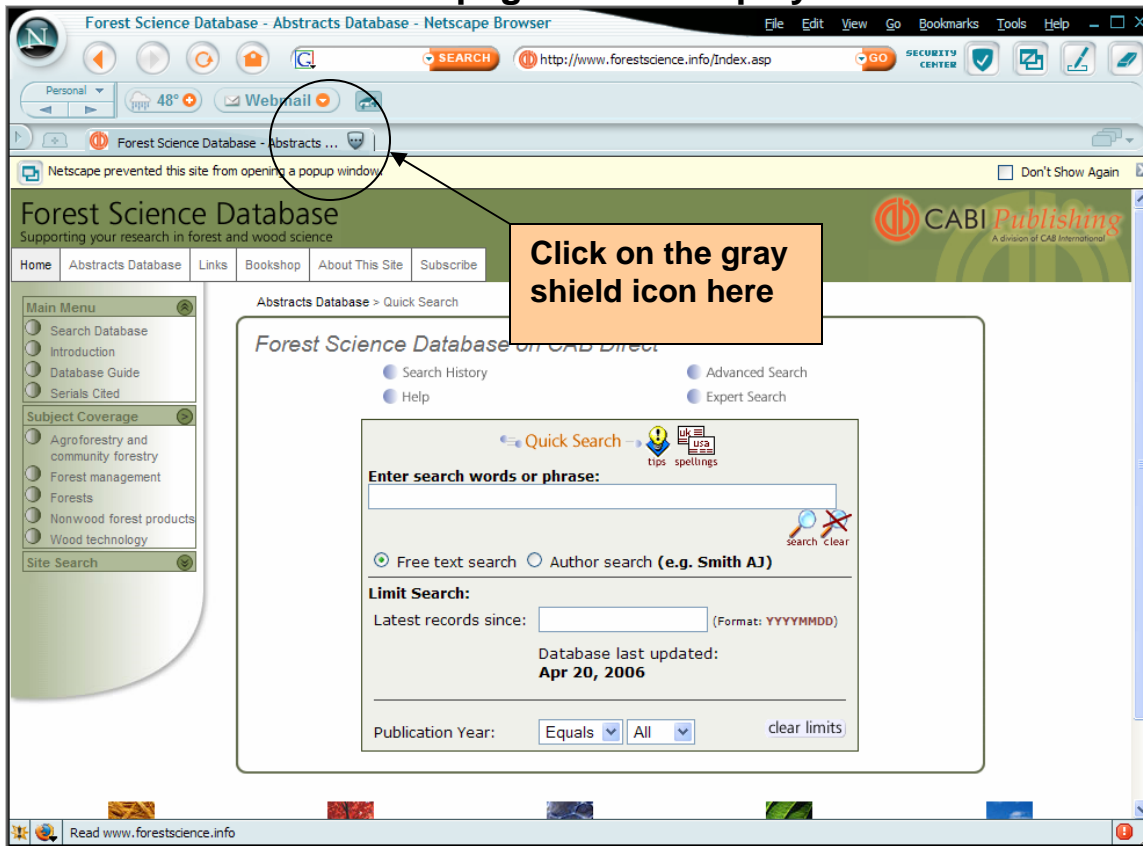

Internet Explorer

- Click on the “Tools” menu
- Select “Internet Options”
- Select the “Privacy” tab
- Block popups should be checked. Do NOT uncheck this box. Instead, click on the box that reads “Settings...” and in the box indicated by “Address of Website to allow” type in the URL (e.g. www.forestinfo.com – do not type in the http:// or anything after the .com, .org, .edu, etc.)
- Click on the “Add” button
- Click “Close” at the bottom of the window

Netscape

- Go to the site for which you would like to unblock popups.
- See diagram on next page.

- Click on the shield in the page title as displayed in the active tab

- Click on the “Advanced” tab and select the “Allow unrequested pop-up windows” box. This allows pop-ups only for the current site.
