Power Your Academic Voice With Podcasting

2:30 PM, Wednesday, March 4th | Innovation Hub, Rm 158

Ever thought about turning your ideas into something people want to listen to? This hands-on workshop introduces podcasting as a creative academic skill, not just a hobby.

You'll learn the basics of podcast formats, how to choose a compelling topic, and how scripting and recording can elevate class projects, presentations, and research. Whether you're tired of traditional essays or curious about

new ways to express your thinking, podcasting opens the door to clearer communication and stronger storytelling.

This session is designed for students who want their work to stand out, sound confident, and travel beyond the classroom. No experience required, just curiosity and a willingness to try something new.

Come learn how your voice can become one of your strongest academic tools. Lunch included.

Learn How 3D Printing Can Elevate Your Coursework!

2:30 PM, Wednesday, February 18th | Innovation Hub, Rm 158

Ever wished you could hold your ideas in your hands? This introductory workshop breaks down how 3D printing can support class projects, research, and creative problem-solving.

You'll learn how to find or build 3D models, edit them for accuracy, and prepare files for successful printing using industry-standard software. The focus is practical and beginner-friendly, designed to help you see how moving from concept to physical object is simpler than you might think.

Whether you're in engineering, art, science, or just love to make things, 3D printing is a powerful skill to add to your academic toolkit. No prior experience needed. Snacks included.
